

# VedAroma—Winning Points

**HIGHEST FIRST:** VEDAROMA use only the highest quality, therapeutic grade, certified organic or wild harvested essential oils, carrier oils and hydrolates, exceptional in their purity.

**PURITY:** VEDAROMA Essential oils are derived from plants that are naturally cultivated without the use of chemical additives. These are certified by internationally recognised certifying agencies EcoControl acc. NCS and NSF.

**QUALITY CONTROL:** We are starting to grow and process essential oils on our own certified organic farms. This gives us greater quality control.

**GREATER POTENCY:** Our essential oils are derived through a slow distillation process, at lower temperatures. This ensures the retention of all the active components in the oils, resulting in greater potency, effectiveness and a more delightful fragrance.

**UNIQUENESS:** All our products are energised, after bottling, using a unique and highly effective water vortex system. This enhances the quality.

**LONGER SHELF LIFE:** For longer shelf life of our oils, oxygen is dispelled from the bottle to avoid oxidation during the capping process.

**LIFE SUPPORTING:** The Vedic Melodies played in our production and storage facilities create a harmonious influence which can enhance the potency of the essential oils.

**WELL ORIENTED:** VEDAROMA production and storage is always and only in well-oriented buildings that uphold the life-supporting principles of Vedic Architecture—life according to Natural Law.

**TRIED AND TESTED:** Aroma Therapy Consultants and customers comment that VEDAROMA essential oils are more potent and immediately effective compared to other brands.

**NAME AND FORM:** VEDA means Total Knowledge and its infinite organising power. The name, ‘VEDAROMA’, on our labels, according to research on the intimate relationship between name and form conducted in Japan, brings this quality of life to our product.

**CREATING WORLD PEACE:** Our VEDAROMA team actively engages in and supports peace promoting projects throughout the world.

**SUSTAINABILITY:** VEDAROMA upholds and promotes everything that enhances and protects Nature and our beautiful world. Our love, recognition, respect, and appreciation for the healing power of Mother Nature in plants and flowers, is another important ingredient in our product.

**VEDIC TEAM—VEDIC TECHNOLOGY:** The VEDAROMA team are dedicated to raising the quality of life in every country through Vedic Knowledge—Total Knowledge—because knowledge has organising power, and Total Knowledge has infinite organising power.
